	5510-5670	☐ Yes	□ No	☐ Yes	□ No	☐ Yes	□ No	☐ Yes	☐ No
, ,	 (3) Country code selection ability ☐ Yes ☑ No If yes, pls explain how it was implemented: (4) Meet 15.202 requirement ☑ Yes ☐ No pls check below: ☐ A master device is defined as a device operating in a mode in which it has the capability to transmit without receiving an enabling signal. In this mode it is able to select a channel and initiate a network by sending enabling signals to other devices ☑ A client device is defined as a device operating in a mode in which the transmissions of the 								
(5)	device are under control of the master. A device in client mode is not able to initiate a network.								

(If apply, pls help to provide explanation on it was implement, and how software was controlled)
